

NO MORE MONKEYWORK WITH AEMADMIN

Pieter-Jan Drouillon

AEM Developer Meetup NL - May 8, 2018

ABOUT ME

Academic background

Short-lived career in Supply Chain

Full-stack developer @ Design Is Dead

WHY?

POINT & CLICK

1. Update property
2. Add node
3. Install content package

STUMBLED ON ...

Sling Curl Command Cheat Sheet

 [sergeimuller / gist:2916697](#) ★ Star 118 🔗 Fork 57
Last active 26 days ago

[Code](#) [Revisions 14](#) [Stars 118](#) [Forks 57](#) [Embed](#) [<script src="https://gi..."](#) [Download ZIP](#)

CQ5 curl commands

 [gistfile1.txt](#) Raw

```
1 Note 1: The following CQ curl commands assumes a admin:admin username and password.
2 Note 2: For Windows/Powershell users: use two "" when doing a -F curl command.
3 Example: -F""operation=delete""
4 Note 3: Quotes around name of package (or name of zip file, or jar) should be included.
5
6 Uninstall a bundle (use http://localhost:4505/system/console/bundles to access the Apache Felix web console)
7 curl -u admin:admin -daction=uninstall http://localhost:4505/system/console/bundles/"name of bundle"
8
```

Manipulating Content - The SlingPostServlet

- [Multiple Ways to Modify Content](#)
- [Quickstart: Creating Content](#)
- [Preface: multipart/form-data POSTs](#)
- [SlingPostServlet Operations](#)
 - [Content Creation or Modification](#)
 - [Content Removal](#)
 - [Copying Content](#)

FIRST ATTEMPT

```
function createPage{
    param([int]$port=4502,[string]$path,[string]$name,[string]
    if($deleteFirst){
        deletePage -port $port -path $path -name $name
    }
    $cmd = 'curl.exe -u admin:admin -F"jcr:primaryType=cq:Page
    Invoke-Expression $cmd
    $cmd = 'curl.exe -u admin:admin -F"jcr:primaryType=cq:Page
    Invoke-Expression $cmd
}
```

PROS / CONS

- ✓ Lightweight
- ✗ Testable
- ✗ Easy & consistent syntax

WHY NOT JAVA?

TESTABLE

Junit & Mockito

LIGHTWEIGHT

Apache HttpClient, Commons Lang &
`com.github.tsohr:json`

EASY & CONSISTENT

Naming convention & method chaining

EXAMPLES

ADDING PROPERTIES

```
CompositeCommand cc = new CompositeCommand();
//base website
String[] base_languages = {"nl", "fr", "en"};
String[] base_segments = {"retail", "soho", "sme"};
for(String lang:base_languages){
    for(String segment:base_segments){
        String path = String.format("/content/kpngb-base/%s/%s",
        SetPropertyCommand spc = new SetPropertyCommand(path, "
        cc.add(spc);

        path = String.format("/content/kpngb-base/%s/%s/sales-
        spc = new SetPropertyCommand(path, "enableOnlineSales",
        cc.add(spc);
    }
}
```

QUERY COMMAND

QueryBuilder Debugger

Search >>>

☐ Extract facets

☐ Clear facet cache ([configure](#))

☐ Query is given as URL

type=cq:Page
path=/content

[Available predicates](#)

Query tree + URLs

ROOT=group: [
 {path=path: path=/content}
 {type=type: type=cq:Page}
]

[JSON QueryBuilder Link](#)

[ATOM Feed QueryBuilder Link](#)

path=%2fcontent&type=cq%3aPage

XPath query

/jcr:root/content//element(*, cq:Page)

Filtering predicates

Results

Number of hits: 1141

Time: 0,14 seconds

- [/content/screens/geometrixx/locations/demo/flagship/zdual/device0/screen1](#) ([crxde](#), [html](#), [json](#))
- [/content/screens/geometrixx/locations/demo/flagship/zdual/device0/screen0](#) ([crxde](#), [html](#), [json](#))

```
public QueryCommand addCondition(String key,String value)
public QueryCommand setHitLimit(int limit)
public QueryCommand fullHit()
public QueryCommand propertyExists(String prefix,
    String propertyName)
public int getResults()
public int getTotal()
public boolean hasMore()
```

POSTPROCESS

```
/**  
 * Queries return JSON with an array called hits. This method will pro  
 * @param hit the result to process  
 */  
public abstract void postProcessOneResult(JSONObject hit);
```

DEFINE QUERY

```
public WorkflowInstancesQueryCommand(String status){
    addCondition("path", "/etc/workflow/instances/server0");
    addCondition("p.hits", "full");
    addCondition("orderby", "endTime");
    if(status != null){
        addCondition("1_property", "status");
        addCondition("1_value", status);
    }
    else{
        propertyExists("1_", "status");
    }
}
```

LOOP OVER HITS

```
public class DifferentStatusValuesCommand extends QueryPostPro
    private Set<string> statuses;
    public DifferentStatusValuesCommand(WorkflowInstancesQuery
    super(command);
    statuses = new HashSet<>();
}
@Override
public void postProcessOneResult(JSONObject hit) {
    statuses.add(hit.getString("status"));
}

    public Set<string> getStatuses() {
        return statuses;
    }
}
```

INSTANCE INSTALL

```
CompositeCommand cc = new CompositeCommand();
//Enable crx/de
EnableCrxCommand ecc = new EnableCrxCommand();
cc.add(ecc);
BulkPackageInstallCommand bpic = new BulkPackageInstallCommand
//One off packages for a fresh install
bpic.addPackage("D:\\packages_to_install\\acs-aem-commons-cont
.addPackage("D:\\packages_to_install\\acs-aem-tools-content-0.
.addPackage("D:\\packages_to_install\\AEM-6.3-Service-Pack-1-6
.addPackage("D:\\packages_to_install\\cq-6.3.0-hotfix-19148-1.
.addPackage("D:\\packages_to_install\\Content_auth_PROD_CRQ000
.addPackage("D:\\packages_to_install\\Content_auth_PROD_CRQ000
.addPackage("D:\\packages_to_install\\permissions.zip")
.addPackage("D:\\packages_to_install\\nprd_userGroups.zip");
//install the Java code
```

OTHER FEATURES

- Instance config via cmdline property
- fat jar

CONCLUSION

- Reduce point & click monkeywork
- Testable
- Lightweight
- Easy
